* Encoding Modules include a choice of: magnetic stripe card, contact smart card and contactless smart card encoders and/or proximity card reader.

Printer/encoders of choice for government, corporate and other high security applications.

Meeting the demand for secure, reliable electronic card personalization.

Whether printing on uneven card surfaces, encoding embedded electronics or ensuring high durability of your prints, HDP has you covered.

✂ **Increase the security and durability of your cards.**
Our optional lamination module lets you add a clear or holographic PolyGuard Overlaminate to your cards for unsurpassed protection.

LCD **Never run out of ribbon or cards mid-job again.**
Our SmartScreen LCD tells you what buttons to press, when to load supplies and keeps you up to speed on your print job.

👓 **Stop struggling with temperamental ribbons.**
Fargo's color-coded ribbons are easy and intuitive to install.

📦 **Complete jobs faster.**
The Dual Card Hopper lets you load up to 200 identical cards, or print and encode two different types of cards simultaneously.

✂ **Take the guesswork out of printing cards.**
The HDP600 automatically reroutes defective cards into this handy Reject Card Hopper (available only with lamination module).

📄 **Increase Productivity and decrease errors.**
Save time and avoid mistakes by printing and encoding cards in one easy pass.

HDP **Get the best quality cards possible**
Fargo's High Definition Printing technology is the only technology that can consistently and perfectly print and encode high-security cards with embedded electronics.

🔧 **Make your budget go farther.**
Only Fargo gives you the option of adding encoding or laminating modules to your printer as your needs grow.

💡 **Save money and waste fewer cards**
A Tape-based Card Cleaning System removes dust and debris from cards, improving quality and reducing card waste.
